

Advanced Portfolio Website Prompt — Deep Ghosh

(Paste this entire prompt into Replit AI)

MASTER PROMPT

Build me a **stunning, fully animated, single-page portfolio website** for **Deep Ghosh** — a Computer Engineering student and AI Agent Engineering learner. The website must feel like a premium developer portfolio with advanced micro-animations, dark glassmorphism aesthetic, and smooth interactive elements. This is NOT a basic portfolio — every section must feel alive.

DESIGN SYSTEM & THEME

Color Palette

- **Background:** Deep black (`#050510`) with subtle dark navy gradient (`#0a0a1a`)
- **Primary Accent:** Electric cyan/blue (`#00d4ff`) — used for glows, highlights, borders
- **Secondary Accent:** Purple/violet (`#7b2ff7`) — used for gradients and hover states
- **Gradient Combo:** `linear-gradient(135deg, #00d4ff, #7b2ff7)` — apply to text, buttons, borders
- **Text Primary:** `#ffffff`
- **Text Secondary:** `#a0aec0`
- **Card Background:** `rgba(255, 255, 255, 0.04)` with `backdrop-filter: blur(20px)`
- **Glass Border:** `rgba(0, 212, 255, 0.15)`

Typography

- **Primary Font:** `'Space Grotesk'` from Google Fonts — for headings
- **Secondary Font:** `'Inter'` — for body text
- **Code/Tech Font:** `'JetBrains Mono'` — for skill tags and code snippets
- **Name/Hero Display:** Massive, bold, gradient text with letter-spacing

Visual Identity

- Glassmorphism cards with blur, gradient borders, and inner glow
- Floating gradient orbs in background (animated, slow-moving)
- Subtle noise texture overlay on background

- Everything has a neon glow feel — borders glow on hover
 - No harsh whites — everything is frosted, glowing, layered
-

✨ ANIMATIONS (CRITICAL — Must implement all)

Global

- **Cursor:** Custom animated cursor — a glowing dot with a trailing ring that follows mouse
- **Page Load:** Cinematic loader — progress bar with "Initializing..." text, then fade-in reveal
- **Scroll:** Use `Intersection Observer` — every section animates IN as user scrolls (fade + slide up)
- **Smooth Scroll:** CSS `scroll-behavior: smooth` + JS smooth scroll for nav links

Hero Section

- **Typing animation** on the subtitle text (typewriter effect cycling through roles)
- **Floating particles** in the background using `canvas` or `tsParticles` — connected dot network on dark background
- **Hero photo** has a glowing cyan/purple border ring, rotating gradient border animation
- Name text has a subtle shimmer/glint animation sweeping across

Navbar

- On scroll: navbar gets frosted glass effect + subtle glow border at bottom
- Active nav link has gradient underline animation
- Mobile hamburger menu with smooth slide-down animation

Cards (Skills, Projects, Contact)

- **Hover lift effect:** `transform: translateY(-8px)` with glow shadow intensifying
- **Border glow on hover:** gradient border sweeps around card on hover
- **Stagger animation:** cards animate in one by one with delay when section enters viewport

Skills Section

- Skill bars animate width from 0 to percentage on scroll
- OR skill tags pop in with a bouncy scale animation, staggered
- Tech icons float with subtle `translateY` oscillation (breathing effect)

Projects Section

- Cards flip or slide in from side
- "Coming Soon" badge pulses with a glow animation

Contact Section

- Form fields have glowing focus state with gradient underline
 - Submit button has shimmer sweep animation on hover
-

LAYOUT & SECTIONS

1. NAVBAR

- Fixed top, transparent → frosted glass on scroll
- Logo: `<DG />` styled as code tag with gradient color
- Links: Home, About, Skills, Projects, Contact
- Right side: a glowing "Hire Me" CTA button with gradient border
- Hamburger menu for mobile

2. HERO SECTION (Full viewport height)

Left side:

- Small badge text: `👋 Hello, I'm`
- Huge display name: **Deep Ghosh** (gradient text, shimmer animation)
- Animated typewriter subtitle cycling through:
 - `"Computer Engineering Student"`
 - `"AI Agent Engineer in Training"`
 - `"React & Node.js Developer"`
 - `"API Integration Enthusiast"`
- Short tagline: *"Building intelligent systems at the intersection of code and AI."*
- Two CTA buttons:
 - Primary: **"View My Work"** → scrolls to Projects (gradient fill button)
 - Secondary: **"Let's Connect"** → scrolls to Contact (outlined glass button)
- Social icons row (GitHub, LinkedIn, Discord, Email) with glow hover effect

Right side:

- Circular profile photo of Deep Ghosh
- Photo has animated rotating gradient ring border (cyan → purple)
- Subtle floating animation (up-down, slow)
- Background glow blob behind photo

Background:

- Animated particle network (tsParticles or canvas dots)
 - 2-3 large blurred gradient orbs slowly drifting
-

3. ABOUT SECTION

Layout: Two columns — text left, stats/highlights right

Heading: About Me with gradient underline

Bio text (use exactly this):

I'm **Deep Ghosh**, a Computer Engineering student with a deep passion for Artificial Intelligence and agent-based systems. I'm actively learning **AI Agent Engineering** — building autonomous systems that think, plan, and act.

Beyond the fundamentals of web development, I've immersed myself in the AI ecosystem — experimenting with large language model APIs, building agentic workflows, and exploring the frontier of what's possible when code meets intelligence.

I believe the next generation of software will be **AI-native**, and I'm positioning myself right at that intersection.

Right column — Highlight cards (glassmorphism small cards):

- 🧠 AI Tools Power User: ChatGPT, Claude, Gemini, Perplexity
 - 🔌 API Experience: OpenAI API, Gemini API, Mistral API, Anthropic API
 - 🎓 Currently: Computer Engineering + AI Agent Engineering
 - 📍 Location: West Bengal, India
 - ⚡ Focus: LLM Applications, Agentic AI, Full-Stack Dev
-

4. SKILLS SECTION

Heading: Tech Stack & Skills

Layout: Categorized grid of animated skill cards

Category 1 — Frontend Development

- HTML5, CSS3, JavaScript (ES6+), React.js, Vue.js (basics)

Category 2 — Backend Development

- Node.js, Express.js, REST APIs, Python

Category 3 — AI & LLM Engineering

- LangChain, LlamaIndex (basics), OpenAI API, Gemini API, Mistral API, Anthropic API, Prompt Engineering, RAG Architecture (learning), Agentic Workflows

Category 4 — AI Tools & Platforms

- ChatGPT, Claude (Anthropic), Google Gemini, Perplexity AI, Replit AI, GitHub Copilot

Category 5 — Tools & Others

- Git, GitHub, VS Code, Postman

Skill Tag Style: Pill-shaped tags with gradient border, icon + name, hover glow effect. Group them by category with a category title badge.

5. PROJECTS SECTION

Heading: My Projects

Subheading: *"Building in public — projects coming soon"*

Layout: 3-column responsive card grid

Show 3 placeholder project cards with this style:

- Card has glassmorphism design
- Top: blurred gradient placeholder image area with a code icon
- Badge: 🚧 Coming Soon pulsing glow badge
- Title: Project Name TBA
- Description: *"Currently in development. Check back soon or follow my GitHub for updates."*
- Bottom: GitHub link button (disabled state, grayed) + Live Demo button (disabled)

Below grid:

A note in styled italic: *"Projects are actively being built. Follow [@didoghosh143](#) on GitHub to get notified."*

6. CONTACT SECTION

Heading: `Let's Build Something`

Subheading: *"Whether it's a project collaboration, an opportunity, or just a conversation about AI — I'm always open."*

Layout: Two columns

Left — Contact Info cards (glassmorphism):

Each card has icon + label + value with hover glow:

-  Email: didoghosh143@gmail.com
-  Phone: [+91 7583952349](tel:+917583952349)
-  LinkedIn: linkedin.com/in/thedido
-  GitHub: github.com/didoghosh143
-  Discord: discord.com/users/944944458917617755

Right — Contact Form:

- Fields: Name, Email, Subject, Message (textarea)
 - All fields: glassmorphism style, glowing focus border (cyan)
 - Submit Button: Large gradient button "Send Message →" with shimmer hover animation
 - On submit: show success toast notification with animation
-

7. FOOTER

- Center-aligned
 - Logo + name: `<Deep Ghosh />`
 - One-liner: *"Turning curiosity into code, one commit at a time."*
 - Social icons row (same as hero)
 - Copyright: `© 2025 Deep Ghosh. Built with passion & caffeine.`
 - Subtle gradient line separator at top
-

RESPONSIVE DESIGN

- **Mobile (< 768px):** Single column, hamburger nav, reduced particle count, touch-friendly tap targets

- **Tablet (768px-1024px):** 2-column grids, adjusted font sizes
 - **Desktop (> 1024px):** Full layout as described
 - All animations should be performant — use `will-change`, `transform`, `opacity` only
-

✂ TECHNICAL STACK

- **Pure HTML, CSS, JavaScript** (no framework needed — vanilla for Replit)
 - OR **React + Vite** if you prefer component structure
 - **tsParticles** CDN for particle background
 - **Google Fonts** CDN: Space Grotesk, Inter, JetBrains Mono
 - **Font Awesome** or **Lucide Icons** CDN for icons
 - **AOS (Animate on Scroll)** CDN OR custom `IntersectionObserver` for scroll animations
 - **Typed.js** CDN for typewriter effect
 - All in a **single HTML file** or well-organized multi-file structure
-

🔗 PERSONAL DETAILS TO USE

Field	Value
Name	Deep Ghosh
Email	didoghosh143@gmail.com
Phone	+91 7583952349
LinkedIn	https://www.linkedin.com/in/thedido
GitHub	https://github.com/didoghosh143
Discord	https://discord.com/users/944944458917617755
Location	West Bengal, India
Role	Computer Engineering Student & AI Agent Engineer

⚠️ IMPORTANT INSTRUCTIONS FOR REPLIT AI

1. **DO NOT use any template or boilerplate** — build this from scratch following the exact design system above
 2. **Profile photo:** Leave an `<img>` tag with `id="profile-photo"` and `src="./photo.jpg"` — I will upload the photo manually
 3. **All animations must actually work** — test scroll animations, hover effects, typewriter
 4. **Glassmorphism must be real** — use `backdrop-filter: blur()`, transparent backgrounds, gradient borders
 5. **The particle canvas must load on page open** — connect dots animation in hero
 6. **Custom cursor must work** on desktop screens
 7. **Mobile responsive is mandatory** — test all breakpoints
 8. **No placeholder lorem ipsum** — use the exact bio and content provided above
 9. Make the overall vibe: **dark, futuristic, AI-native, premium developer portfolio**
 10. The website should feel like it belongs to someone building the future of AI
-

End of prompt. Paste everything above into Replit AI.
